

## Wagner Club Lambs

Our current flock was started back in 1986 in Pea Ridge, AR when my sisters and I joined 4-H. Dad, Robert, had raised sheep his entire life in Iowa and won the Iowa State Fair 4-H market lamb show. We started with 10 ewes and a ram and have grown to as big as 100+ ewes at one time. When I went to college, dad and my sisters kept the flock going. And when I finished college and got married, we moved dad and the flock to Greenwood, AR, our current residence.

The farm has had good success with class winners at the Iowa State Fair, NAILE, Arkansas State Fair, jackpots, and county fairs all over the country. We love to win. We also love helping kids. That has been our biggest success story, looking back at all the kids, now adults many of them, that we have had a small part in shaping and helping. Whether it was fitting clinics that we've talked at, kids getting their projects directly from us, dad's years of service at Little Rock, Ft. Smith, and Benton County, or people we've met at sales and shows, that's the best part of this business. And we look forward to continuing that tradition for a long time.

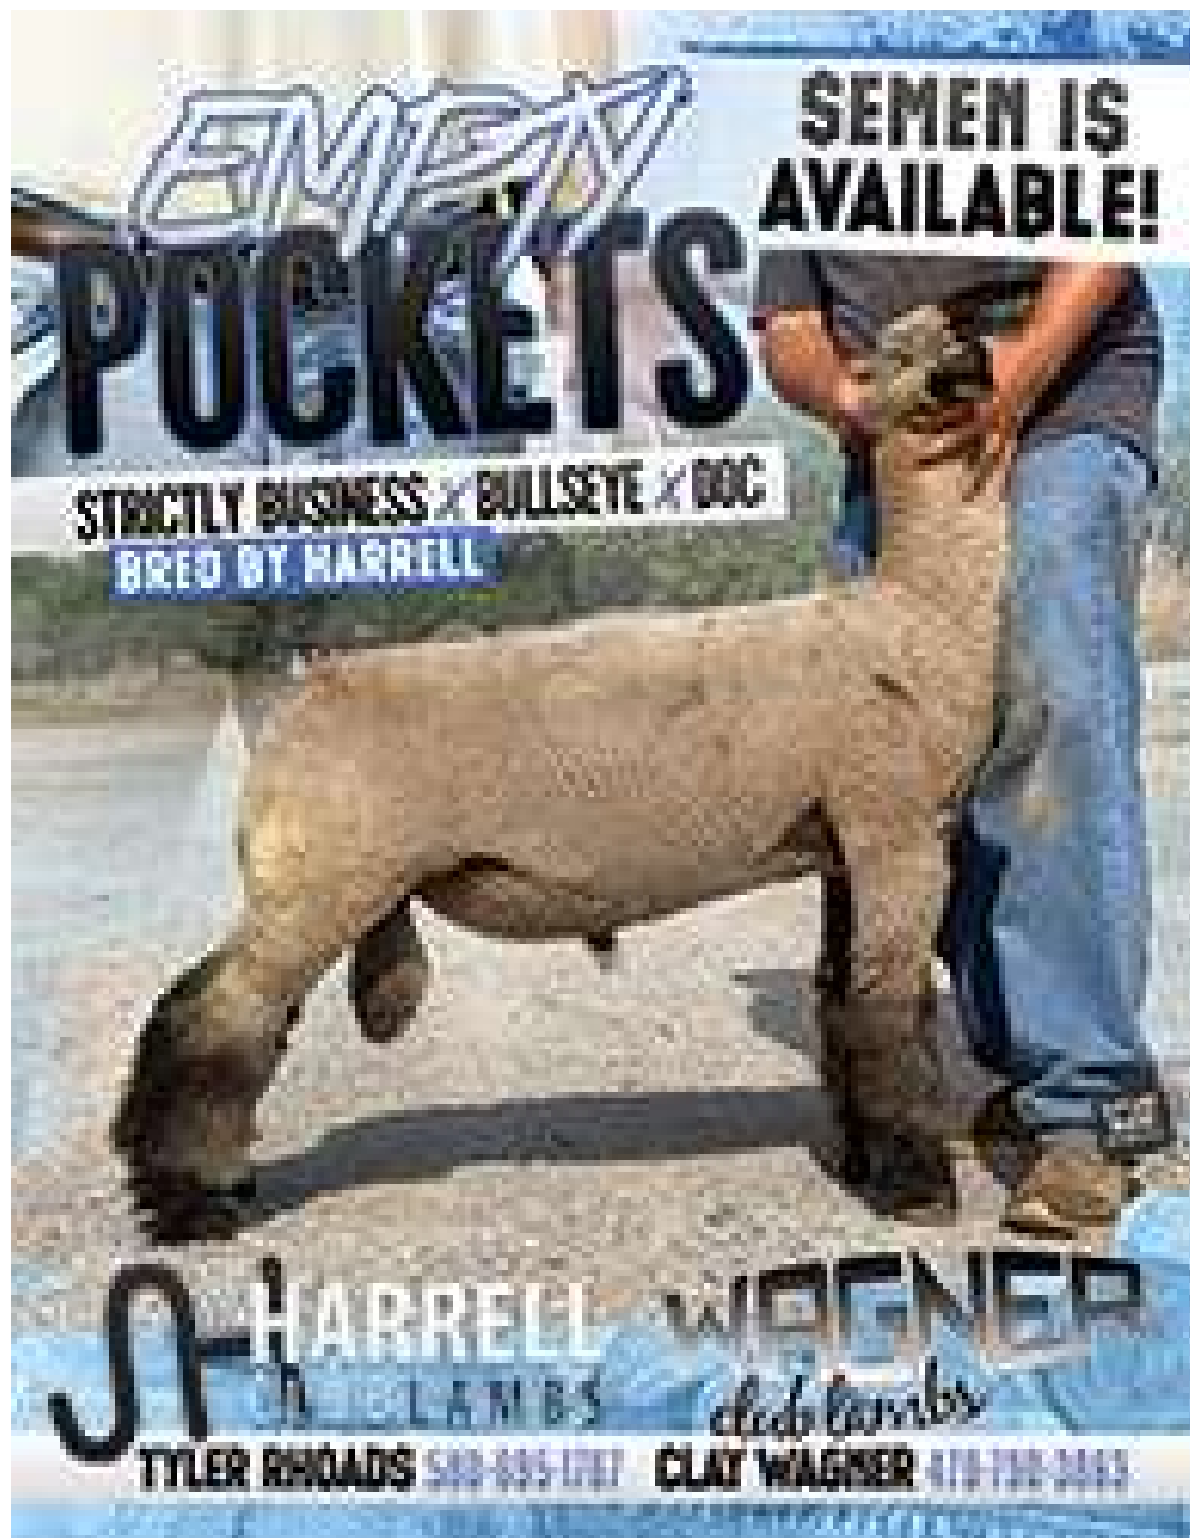

The flock has been expanding it's horizons in several directions the past few years. As we decreased the flock from the 100+ to a more manageable 40 head, it opened new doors in some areas and made others far more challenging. The last three years we have taken advantage of AI, and the increase in depth and quality is awesome. We've invested in elite genetics, like the Empty Pockets ram. Now with a very solid base, we are looking to expand our numbers and reach out even farther.

Local and in state buyers have been very loyal and we appreciate each and every one of them. With the investments we've made and recent success, we are trying to bring new buyers to the state. So, we will have our first ever online sale April 5, 2022, on SOnline.

I look forward to the future of our farm and working with many new and repeat customers. The barns are always open, and visitors are always welcome at Wagner Club Lambs.
